SEMITRONICS VIETNAM 2026

Vietnam Exhibition & Convention Center (VEC), Hanoi, Vietnam

SEMITRONICS VIETNAM 2026

13–15 October 2026 | Vietnam Exhibition & Convention Center (VEC), Hanoi, Vietnam

SEMITRONICS Vietnam is an international exhibition focused on the electronics and semiconductor industries, connecting technology providers, manufacturers, suppliers and industry professionals across Vietnam and the wider ASEAN region.

Key focus areas:

- Semiconductor assembly, packaging and testing
- PCB/PCBA and SMT technologies
- Electronics manufacturing equipment and materials
- Test, measurement and inspection solutions
- Automation, robotics and smart factory technologies
- AI, IoT and digital manufacturing
- Power electronics and e-mobility
- Electronic components and modules

OCTOBER 13 - 15
VEC, Vietnam Exhibition & Convention Center
(Hanoi)

ASSOCIATION OF ELECTRONIC INDUSTRIES IN SINGAPORE

Established in 1973, the Association of Electronic Industries in Singapore (AEIS) is a leading industry association representing companies across Singapore's electronics and semiconductor ecosystem. With over five decades of industry experience, AEIS serves as a trusted platform for businesses to connect, collaborate and grow, while supporting the continued development and competitiveness of the electronics industry.

AEIS brings together companies across the electronics value chain and provides members with opportunities to build meaningful business connections, exchange industry knowledge and stay abreast of market trends and technological developments. Through industry networking, business matching, seminars, workshops, trade missions and capability-building initiatives, AEIS helps members strengthen their capabilities, explore new opportunities and develop strategic partnerships locally and internationally.

As the electronics industry continues to evolve, driven by semiconductors, advanced manufacturing, digitalisation, automation and artificial intelligence, AEIS remains committed to supporting its members in adapting to emerging trends and changing business needs. The Association actively promotes collaboration among industry players and stakeholders, creating platforms for knowledge sharing, business development and regional engagement.

With a strong network and established industry relationships built over more than 50 years, AEIS continues to champion the interests of its members and contribute to the growth of Singapore's electronics ecosystem.

ENTERPRISE SINGAPORE

Enterprise Singapore is the government agency championing enterprise development. It is a statutory board operating under the Ministry of Trade and Industry (MTI) of the Singapore government.

With a global network in over 35 locations around the world, it drives Singapore companies' global expansion while connecting international businesses to trusted partners in Singapore.

Singapore is a powerhouse of growth. As a global hub for trade and innovation, it offers access to a thriving ecosystem of global enterprises, startups, and investors. Known for their commitment to quality and innovation, Singapore companies are also ideal partners for growth.

Enterprise Singapore is here for wherever businesses are growing.
Visit www.enterprisesg.gov.sg for more information.

ADVENT2 LABS CONSULTATION PTE LTD

At Advent2 Labs Consultation Pte Ltd, we help organizations transform operational complexity into clarity, insight, and confident decisions. Combining simulation, advanced analytics, and industry expertise, we provide practical, data-driven solutions that deliver measurable business value.

Our approach enables organizations to visualize operations, identify bottlenecks, evaluate scenarios, optimize resources, and test improvement strategies before committing to costly changes. By simulating possibilities in a controlled environment, decision-makers can reduce uncertainty, manage risk, and make informed choices with greater confidence.

Our consulting services are built around four core pillars:

- 1. Operational Simulation – Understand.**
Model real-world operations to uncover system behaviour, constraints, and performance opportunities.
- 2. Scenario & Decision Analysis – Explore.**
Test alternatives and evaluate potential outcomes before implementation.
- 3. Operational Optimisation – Improve.**
Identify better ways to deploy resources, enhance efficiency, and strengthen operational performance.
- 4. Simulation-Driven Consulting – Act.**
Translate simulation insights into practical strategies, actionable recommendations, and sustainable improvements.

At Advent2 Labs, we turn complexity into insight, insight into decisions, and decisions into better outcomes.

Simulate. Don't Speculate.

ALLIED SOLUTIONS PTE LTD

Allied Solutions Pte Ltd is a Singapore-based industrial technology solutions provider serving manufacturers across Southeast Asia. We help organizations improve operational efficiency, data connectivity, system resilience and cybersecurity through proven industrial automation and digital manufacturing solutions.

Our portfolio covers industrial data connectivity, SCADA, MES, production intelligence, industrial reporting, OT cybersecurity and fault-tolerant computing. We work with leading technology partners to deliver solutions that connect machines, systems and data across the factory floor and enterprise.

For the semiconductor and electronics manufacturing industries, Allied Solutions supports critical applications including equipment connectivity, real-time production monitoring, manufacturing data collection, reporting, system availability and secure OT/IT integration. With regional capabilities in Singapore, Malaysia and Vietnam, we provide solution consultation, system integration support and technical expertise to help manufacturers build connected, resilient and data-driven operations.

DIRAK ASIA PACIFIC PTE LTD

DIRAK, established in 1991 by Dieter Ramsauer, develops, manufactures, and sells innovative components for enclosure construction, with a primary focus on pioneering products that exceed your requirements. Our solutions include mechanical and electronic access systems. Our catalog features more than 4,500 products, including hinges, latches, handles, gaskets, and access hardware, all protected by numerous patents. Each product is engineered for durability, security, and ease of installation across a wide range of industrial applications. We continuously refine our portfolio to offer the best and most reliable solutions for your specific needs.

Beyond standard catalog items, DIRAK provides customized product development, working closely with customers to design application-specific components that solve unique challenges. With an international network of production and distribution, our products are available globally and supported by knowledgeable technical teams. Whether you need standard enclosure hardware or a fully tailored system, DIRAK's product range delivers precision, performance, and long-term value.

DIRAK ASIA PTE LTD has been established since 1997 and is a subsidiary under ISDN Holdings Limited, a company that is publicly listed on both the SGX and HKE exchanges.

EDACPOWER ELECTRONICS PTE LTD

EDACPOWER is a premier global technology partner specializing in advanced semiconductor reliability testing, burn-in systems, environmental chambers, and customized power solutions. Supporting manufacturers, OSATs, automotive electronics suppliers, and research and development laboratories worldwide, the company delivers high-performance test platforms engineered to validate quality across the entire device lifecycle.

Through its specialized EP Power and EP Solution business units, EDACPOWER integrates industry-leading portfolios including ATIS reliability systems and Tonghui precision instrumentation. The company's comprehensive testing capabilities cover HTOL, HTRB, HTGB, H3TRB, wafer-level reliability, and high-power cycling. These advanced platforms are fully optimized for standard silicon and next-generation Wide Bandgap (SiC and GaN) materials, ensuring strict compliance with automotive standards like AEC-Q101 and AEC-Q100.

By combining massive-capacity burn-in chambers with high-precision characterization tools, such as Source Measure Units (SMUs) and C-V analyzers, EDACPOWER successfully bridges the critical gap between laboratory failure analysis and high-volume factory screening.

Backed by dedicated regional support hubs, EDACPOWER provides local engineering expertise, rapid system delivery, and complete integration services for global semiconductor IDMs, OSATs, automotive electronics suppliers, and power device makers looking to secure unmatched operational quality.

ELEMENT14 PTE LTD

element14 is a leading distributor of electronic components, technology and solutions, helping engineers, businesses and innovators bring ideas to life—from design and prototyping through production, maintenance, and repair.

As part of Avnet, element14 combines extensive product availability with technical expertise, industry knowledge and reliable supply-chain support. Across Asia Pacific, we connect customers with more than 2,000 leading manufacturers and access to over 1 million products, covering semiconductors, passives, connectors, electromechanical components, automation, embedded solutions, test and measurement, and more.

Operating as Newark in the Americas, Farnell in Europe, the Middle East, Africa and Japan, and element14 across Asia Pacific, we serve customers through a trusted global network of established brands.

More than a component distributor, element14 is a one-stop destination for electronic design and manufacturing needs—from components and development tools to test equipment, automation products and production solutions, all supported by product information, technical resources and supply-chain services.

INNOVATIVE TOOL TECHNOLOGY PTE LTD

Innovative Tool Technology Pte Ltd (IN2-TECH) was established in 2003 and is a Singapore-based manufacturer specialising in automation and semiconductor equipment. The company designs and develops standard and customised solutions to meet the specific production needs of customers across the semiconductor, connector and electronics industries.

IN2-TECH's capabilities include semiconductor backend automation, test and inspection systems, trim and form solutions, laser-based systems, precision parts fabrication, microelectronic design and dedicated automation solutions. The company also provides spare parts, technical training and test-house services, offering customers comprehensive support from equipment development to after-sales service.

With operations in Singapore, Malaysia and China, IN2-TECH combines engineering expertise, practical manufacturing experience and customer-focused support to deliver reliable and flexible solutions. The company continues to develop innovative equipment and services aimed at improving productivity, quality and manufacturing efficiency for customers in regional and international markets.
